8.OH L Sml D Cond	17.ST1 Intro Music
9.OH R Sml D Cond	18.ST2 Intro Music

NOTES

The input list is just a guide, we understand that not all venues require full micing of kit and do not always have what we specified above. We have full faith in the engineer and staff who know the venue. Tell us what you need from us :-)

Intro music will be supplied to sound engineer on an MP3 player upon arrival.

We have a large backdrop and will need a suitable and safe way of hanging it

All vocals require reverb. Centre (lead vocals) require long/short delays. A setlist with marked tracks will be given to engineer to indicate when delays needed.

Monitor mixes.

Drums: Full band mix vocal heavy.

Stage Right: ST R Vox and sometimes bass, will request if needed.

Centre: C Vox Heavy with a little Centre Guitar

Stage Left: ST L Vox and sometimes ST R guitar, will request if needed

Kit share.

Cabs and drum shells are allowed to be shared with main support IF we are contacted with good notice prior to the show.

Support band must provide.. heads, combos, snare, cymbals and breakables. Failure to establish relationship with us in advance will result in the supports having to use their full backline.

Contacts.

Joe Guatieri (main band contact) - 07958282820

David Devonald (2nd Band contact) - 07788754589

Darren Griffiths (Agent) - 07884348176
